

Blue is read straight from SEC XBRL. Amber is prose the model summarised.

How did Nvidia's revenue change from FY2024 to FY2025, and what drove it?

Nvidia's revenue increased from \$60,922,000,000 in FY2024 (ended 2024-01-28) to \$130,497,000,000 in FY2025 (ended 2025-01-26), representing a growth of 114% year-over-year. This significant increase was primarily driven by strong demand for data center compute and networking platforms, particularly for accelerated computing and AI solutions. The revenue from Data Center computing grew 162%, largely due to demand for the Hopper computing platform used for large language models, recommendation engines, and generative AI applications. Additionally, revenue from Data Center networking grew 51%, driven by Ethernet for AI revenue, which includes the Spectrum-X end-to-end ethernet platform F2 9 10 12.

0% in fiscal year 2025 from 72.7% in fiscal year 2024. The year over year increase was primarily driven by a higher mix of Data Center revenue. Provisions for inventory and excess inventory purchase obligations totaled \$3.7 billion and \$2.2 billion for fiscal years 2025 and 2024, respectively. Sales of previously reserved inventory and settlements of excess inventory purchase obligations resulted in a provision release of \$689 million and \$540 million for fiscal years 2025 and 2024, respectively. The net effect on our gross margin was an unfavorable impact of 2.3% and 2.7% in fiscal years 2025 and 2024, respectively. 1/3

Nike doesn't tag operating income. So it says so, instead of deriving one.

What was Nike's operating income in FY2025?

The figure for Nike's operating income in FY2025 is not available in the filings' structured data.

ROUTE NUMERIC SCOPE — SOURCES 0 VERIFIED · 0 EXCERPT RERANKED 5 KEPT

Before that guard existed, the model went looking in the narrative text, found EBIT, and handed it back as operating income. Confidently, with no hedging.

Numbers and narrative take separate paths to the prompt.
